

# SANTIAGO RODRIGUEZ

Senior Data Integration Analyst & Solutions Architect

santiago.rodriguez.it@outlook.com • [linkedin.com/in/santiago-rodriguez8](https://linkedin.com/in/santiago-rodriguez8) • [Portfolio](#)

## PROFESSIONAL PROFILE

---

I am a solutions-minded data and integration professional who has grown well beyond my formal title. Over four years at VytOne, I have evolved from executing data integrations to acting as an internal solutions architect, from owning projects end-to-end, building AI-powered operational workflows, leading DevOps and Agile practices, and designing scalable data infrastructure for a pharmacy benefit management platform.

## CORE COMPETENCIES

---

- End-to-end project ownership, from ambiguous problem statement to deployed, scalable solution
- Solutions architecture: designing automated ETL systems, data pipelines, and operational tooling
- AI & LLM integration into business workflows (documentation, reporting, calendar, meeting ops)
- DevOps leadership: CI/CD pipeline management, environment coordination, release planning
- Agile/Scrum facilitation: sprint planning, backlog management, retrospectives
- Data infrastructure: SQL Server, Oracle, FTP systems, Power BI, Tableau
- Stakeholder communication across technical and non-technical audiences
- Cross-functional collaboration and influence without formal authority

## PROFESSIONAL EXPERIENCE

---

### Senior Data Integration Analyst / Solutions Architect | VytOne

January 2023 – Present • Remote

- Architect end-to-end automated solutions for operations teams, owning the full project lifecycle from stakeholder requirements through production deployment and ongoing iteration.
- Lead DevOps efforts including CI/CD pipeline setup, environment management, and release coordination across engineering teams; facilitate Agile sprint planning, sprint reviews, and retrospectives.
- Integrate AI and LLM tools into team workflows to automate meeting notes, documentation management, calendar coordination, and operational reporting, enabling teams to focus on higher-order work.
- Embed with business stakeholders to identify workflow bottlenecks, then design and deliver tailored data-driven solutions that address root causes rather than surface symptoms.
- Maintain and improve ETL pipeline infrastructure and data file exchange systems connecting clients and third-party vendors to VytOne's PBM platform.
- Build operational dashboards in Power BI and Tableau providing real-time visibility into data processing, integration health, and business KPIs.
- Serve as Subject Matter Expert on VytOne's PBM platform for internal teams and external clients, driving adoption and reducing friction in integration processes.

### Data Integration Analyst | VytOne

March 2021 – December 2022 • Remote

- Implemented and maintained inbound/outbound data file exchanges ensuring seamless client and third-party integrations with high data accuracy and minimal downtime.
- Executed SQL scripts for backend file processing, reconciliation analysis, and reporting; provided accurate data insights that informed operational decisions.
- Conducted system testing for new features and integrations, minimizing post-deployment issues and ensuring high-quality releases.
- Collaborated closely with clients, account managers, and implementation teams to streamline onboarding and accelerate time-to-integration.

## EDUCATION

---

### Bachelor of Science, Information Technology

University of Central Florida, College of Engineering and Computer Science • Orlando, FL • GPA: 3.50 • Graduated December 2020

## TECHNICAL SKILLS

---

**Languages:** Python (NumPy, Pandas, SciPy), SQL (Access, SQL Server, Oracle), PowerShell, Git

**Data & Analytics:** ETL Pipeline Design, Power BI, Tableau, FTP/FileZilla, dbt (exposure), Redshift (exposure)

**AI & Automation:** LLM integration (local & cloud), Claude, Ollama, AI-assisted workflow automation, AI documentation tooling

**DevOps & Agile:** CI/CD, Git, JIRA, Agile/Scrum Sprint Planning, Confluence, Trello, Microsoft Project

**Platforms:** Microsoft 365, Salesforce, Zoho CRM, Notion, SharePoint, OneNote
